COLONOSCOPY PROCEDURE REPORT
Date: 2023-10-06 Endoscopist: Dr. Aisha Bello

Indication: Average-risk screening, age 45.
Prep quality: Good Boston 8/9.
Extent: Cecum reached; ileocecal valve identified.
Findings: One 4 mm sessile polyp, ascending colon, removed with cold snare.
No other lesions. Normal rectal mucosa.
Recommendation: Repeat colonoscopy in 7 years pending pathology.
